

## **Clean Water Act Methods: Overview of EPA's CWA PFAS Method Activities**

*S. Bekah Burket, U.S. EPA*

The Clean Water Act Methods group is currently validating two methods for PFAS analysis in environmental matrices: Draft Method 1633 for 40 PFAS compounds and Draft Method 1621 for adsorbable organic fluorine. This presentation will provide a brief overview of each Draft Method, as well as an update on development progress.
